SPECIAL ISSUE: TRANSFER OF ELEMENTS THROUGH THE HYDROLOGICAL CYCLE

CONTENTS

Preface 1

OVERVIEWS

From rain to lake: water pathways and chemical changes
I.Th. Rosenqvist (Oslo, Norway) 3
Limitations to the understanding of ion-exchange and solubility controls for acidic Welsh, Scottish and Norwegian sites
C. Neal, M. Neal, D. Waters (Wallingford, U.K.), J. Mulder, N. Christophersen (Oslo, Norway), R.C. Ferrier, R. McMahon (Aberdeen, U.K.) and R. Harriman (Pitlochry, U.K.) 11
Ecosystem modelling: science or technology?
M. Hauhs (Göttingen, F.R.G.) 25

CATCHMENT STUDIES

The origins of acid runoff in a hillslope during storm events
K.H. Bishop, H. Grip and A. O'Neill (Umeå, Sweden) 35
Evidence for long-term deterioration of streamwater chemistry and soil acidification at the Birkenes catchment, southern Norway
N. Christophersen, B. Vigerust, A. Henriksen (Oslo, Norway), A. Robson, C. Neal and P.G. Whitehead (Wallingford, U.K.) 63
Reversal of stream acidification at the Birkenes catchment, southern Norway: predictions based on potential ANC changes
N. Christophersen, J. Mulder (Oslo, Norway) and C. Neal (Wallingford, U.K.) 77
Element budgets of two contrasting catchments in the Black Forest (Federal Republic of Germany)
K.H. Feger, G. Brahmer and H.W. Zöttl (Freiburg im Breisgau, F.R.G.). 85
Influence of acid atmospheric inputs on surface water chemistry and mineral fluxes in a declining spruce stand within a small granitic catchment (Vosges Massif, France)
A. Probst, B. Fritz, D. Viville (Strasbourg, France) and E. Dambrine (Seichamps, France) 101
Effects of vegetation type on the biogeochemistry of small catchments (Mont Lozere, France)
F. Lelong, P. Durand, J.F. Didon-Lescot (Orleans, France) and C. Dupraz (Montpellier, France) 125
Longitudinal patterns of concentration–discharge relationships in stream water draining the Hubbard Brook Experimental Forest, New Hampshire
G.B. Lawrence (Orono, ME, U.S.A.) and C.T. Driscoll (Syracuse, NY, U.S.A.). 147
Precipitation, throughfall, soil solution and streamwater chemistry in a holm-oak (*Quercus ilex*) forest
F. Rodà, A. Avila and D. Bonilla (Bellaterra, Spain) 167
Hydrogeochemical variations in Hafren forest stream waters, Mid-Wales
C. Neal, C.J. Smith, J. Walls, P. Billingham, S. Hill and M. Neal (Wallingford, U.K.) 185
Preliminary analysis of water and solute movement beneath a coniferous hillslope in Mid-Wales, U.K.
N.A. Chappell, J.L. Ternan, A.G. Williams (Plymouth, U.K.) and B. Reynolds (Bangor, U.K.). 201

Soil water in the riparian zone as a source of carbon for a headwater stream
D.M. Fiebig, M.A. Lock (Bangor, U.K.) and C. Neal (Wallingford, U.K.) 217
Stormflow hydrochemistry of a small Welsh upland catchment
A.D. Muscutt, H.S. Wheater (London, U.K.) and B. Reynolds (Bangor, U.K.) 239
Hydrological and hydrochemical fluxes through vegetation and soil in the Allt a'Mharcaidh, western Cairngorms, Scotland: their effect on streamwater quality
R.C. Ferrier, T.A.B. Walker, J.D. Miller, H.A. Anderson (Aberdeen, U.K.) and R. Harriman (Pitlochry, U.K.) 251
Short-term ionic responses as indicators of hydrochemical processes in the Allt a'Mharcaidh catchment, western Cairngorms, Scotland
R. Harriman, E. Gillespie, D. King, A.W. Watt, A.E.G. Christie, A.A. Cowan and T. Edwards (Pitlochry, U.K.) 267
The effect of clearfelling a Sitka spruce (*Picea sitchensis*) plantation on solute concentrations in drainage water
J.K. Adamson and M. Hornung (Grange-over-Sands, U.K.). 287
Geochemical control of aluminium concentrations in acidified surface waters
H.M. Seip, S. Andersen and A. Henriksen (Oslo, Norway) 299

MIXING RELATIONSHIPS

Modelling streamwater chemistry as a mixture of soilwater end-members — a step towards second-generation acidification models
N. Christophersen (Oslo, Norway), C. Neal (Wallingford, U.K.), R.P. Hooper (Doraville, GA, U.S.A.), R.D. Vogt (Nesøya, Norway) and S. Andersen (Ås-NLH, Norway) 307
Modelling streamwater chemistry as a mixture of soilwater end-members — an application to the Panola Mountain catchment, Georgia, U.S.A.
R.P. Hooper, N.E. Peters (Doraville, GA, U.S.A.) and N. Christophersen (Oslo, Norway) 321
Hydrograph separation using chemical techniques: an application to catchments in Mid-Wales
A. Robson and C. Neal (Wallingford, U.K.) 345
Conservative mixing of water sources: analysis of the behaviour of the Allt a'Mharcaidh catchment
F.M. Kleissen, H.S. Wheater, M.B. Beck (London, U.K.) and R. Harriman (Pitlochry, U.K.). 365

MODELLING

A method for predicting the extremes of stream acidity and other water quality variables
A.J. Jakeman, J.A. Taylor (Canberra, A.C.T., Australia), P.G. Whitehead, A. Robson and A. Jenkins (Wallingford, U.K.). 375
Towards developing a new short-term model for the Birkenes catchment — lessons learned
D. Lundquist, N. Christophersen (Oslo, Norway) and C. Neal (Wallingford, U.K.) . . . 391
A regional model of acidification in Wales
A. Jenkins, P.G. Whitehead, T.J. Musgrove (Wallingford, U.K.) and B.J. Cosby (Durham, NC, U.S.A.). 403
